

History

AEi Communications Corp., based in Dallas, Texas, USA, was founded in May 2010. AEi was established as a subsidiary of G-Tek Electronics, an engineering design and manufacturing company with its factory located in Malaysia. G-Tek Electronics was the primary manufacturer and worldwide supplier of hospitality telephony solutions, and had delivered millions of high-quality guest room phones to the industry.

AEi was formed to serve the hospitality industry with advanced in-room analogue and IP telephony solutions.

Products, Engineering & Operations

The engineer team in Texas and Taiwan integrate the latest technological advance to create innovative products while satisfying the growing and changing needs of the Hospitality Industry. All the AEi products are compatible with existing analog and IP hotel communications' infrastructures and all the popular PBX system

Wi-Fi Solutions

Benefits of Wi-Fi Solutions

- Simple Installation:**
 No extra wiring. Only power outlets are required.
- Easier Maintenance:**
 Update phone settings and display contents wirelessly. No fixture is required.
- Competitive Cost:**
 Wi-Fi series is designed to be a more competitive series.

- 1 or 2 Lines
- Standard/ Slim design

- Required function keys
- Unique logo

- Icons on screen in carrousel style
- Unique logo

- Base lower case & stand PMS black
- Base upper case, H/S top & bottom cover PMS black
- H/S coil cord PMS black

Suite keeper - control up to 15 IP extensions

Room keeper - control up to 2 IP extensions

Monitor extensions without disturbing guests

Our IMM software monitors all AEi phones within a property, including extensions, and will notify staff of any issues before hotel guests are even aware.

LINE appearance indication

Allows calls to be put on hold on one phone and picked up on another phone within the room or suite.

Automatic conferencing between extensions and incoming/ outgoing call

Easily join an existing call by picking up another extension within the room or suite making your IP telephone perform as simply as an analogue phone.

Suite keeper - control up to 15 IP extensions

Suite keeper, Room keeper solution

IP licenses = 2

VX Cordless handsets

GR Cordless handsets

Cutting Edge Technology

Maximum 2 SIP licenses required
Highly flexible to expand in-room phone network
Reduce establishment cost

IP licenses = 2

Room keeper - control up to 2 IP extensions

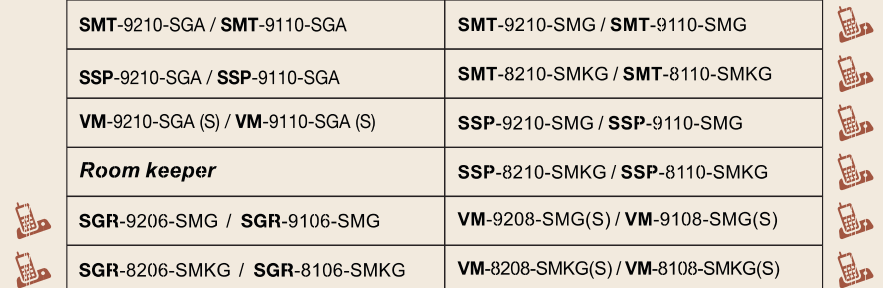

Excellent uptime resiliency

A predefined extension can automatically register to the PBX for continuation of service, should the Room Keeper or Suite Keeper master fail.

User friendly

AEi SIP phones emulate the simplicity of analogue phones while providing triple the power, for the benefit of hotel guests.
